

PREMIUM HYDRAULIC FLUIDS IS YOUR EQUIPMENT WORKING AS HARD AS IT CAN?

MAXIMIZE PRODUCTIVITY + FUEL EFFICIENCY = \$9,000 Annual Savings*

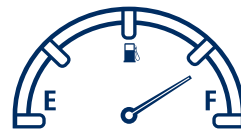

*In field tests running a medium-sized excavator using both Clarity® Synthetic Hydraulic Oil AW 46 and a traditional monograde hydraulic oil 46, the increase in productivity and fuel efficiency can be estimated at approximately \$9,000 in annual savings with approximately \$300 annual investment in lubricant costs. Actual savings will vary depending on equipment type, load, and other operating conditions.

OIL LIFE

2X

Lost energy leads to lost productivity.

86%
Lost Energy

14%
Useful Work

Only 14% of the energy in your hydraulic system goes to actual, productive work. The rest of the energy is bled off by meter loss, pump loss and more. Chevron premium hydraulic lubricants are specially formulated to maximize useful work and oil life.

Premium works

With an annual investment of an estimated \$300, the operation was able to gain an estimated **\$9,000** in productivity and fuel savings.
