

Navigating Energy Transition for Waste Haulers

Fleet management has never been more complicated as companies implement new Environmental and Social Governance (ESG) standards. Fleet Managers are challenged with transitioning equipment, finding sources of alternative fuel products and adjusting maintenance practices. Chevron believes affordable, reliable, and lower carbon energy is at the core of the energy transition and recognizes each company's path is unique to where they are today and where they aspire to be in the future.

The path to net zero is not straight forward. Renewable fuels are an important product that can help reduce the carbon intensity of transportation fuels while meeting the world's growing energy needs. As regulations vary widely by geographic region, Chevron can help tailor the product mix to fit your evolving business needs offering lower carbon drop in fuels now while products, technology, and infrastructure continue to evolve.

“Chevron has the infrastructure, assets and capabilities to produce and distribute renewable natural gas and other fuels that offer lower carbon options for critical industries in search of solutions.”

*Mike Wirth,
Chevron Chairman
and CEO*

Supporting your Fleet Transition

Chevron Business Development Specialists work to understand the nuances of fleet businesses and navigate your transition to lower carbon. Our expert team is ready to support your team through this transition by providing:

- Analysis of current carbon impact
- Identification of governmental incentive programs
- Fuel selection and supply
- Maintenance fluid selection
- Fleet monitoring
- Training programs

Our team will collaborate to learn your business, define goals and implement the solutions that fit your objectives. Through understanding your business, we can work together and achieve a brighter future.

Leading the Way

As an energy leader, Chevron is making significant investments to steward the energy transitions for our customers as well our own operations. We are committed to providing a holistic offering of products and services to simplify your fleet’s needs.

Commercial Fueling Products	Maintenance Products	Fleet Services
<ul style="list-style-type: none">• Conventional gasoline & diesel• Renewable diesel• Biodiesel blends• Renewable/Compressed Natural Gas• Hydrogen	<ul style="list-style-type: none">• Engine oils• Driveline fluids• Greases• Coolants• ISOCLEAN® Certified Lubricants	<ul style="list-style-type: none">• Commercial fueling program• Payment Solutions• Inventory management• LubeWatch Fluid Monitoring• Best In Class Site Assessment• Preferred Vendor Program

Our history: Chevron began as the Pacific Coast Oil Company founded in 1879. Since then, it has evolved into an integrated energy company active in 180 countries. Chevron has over 40,000 employees, supplying 9,000 fueling stations and 200 lubricant service sites in the U.S. and Canada.

Advancing a lower-carbon future: At Chevron, we use our unique capabilities, assets and expertise to deliver progress toward the global net zero ambitions of the Paris agreement. Our approach focuses on actions and investments in three core areas that can deliver measurable progress for today and the future. These actions will make energy and global supply chains more sustainable – helping industries and customers that use our products build the lower-carbon world we all desire.

Support for the long haul: Chevron believes that affordable, reliable, ever-cleaner energy is essential to achieving a more prosperous and sustainable world. Chevron renewable fuels are part of this effort, as well as our explorations into emerging technology for other products such as renewable natural gas (RNG) and bio-feedstocks to produce renewable diesel, biodiesel, and sustainable aviation fuel (SAF). Let us continue to be your trusted supplier and brand of choice to transition your business to a lower-carbon future.

Watch Now:
The future is lower carbon
