

# ARE YOU CONNECTED?

## What Is DataConnect?

DataConnect is a service that will allow you to automatically import your HORIZON sample data into your own data system. If you have your own reporting or asset management system and want the convenience of having your data in one system, this feature is for you!

## What Does DataConnect Consist Of?

- Sample submission
- Sample results
- Equipment maintenance

## What are the Benefits of DataConnect?

- Easily manage all of your sample data in one location
- Increase your ROI
- React quickly to your analysis results
- Instantly update your equipment, and add new components

## Who Should Use DataConnect?

If you have asset management and reporting systems and your IT team has support available to work to integrate data together, then you should use DataConnect.

## How Does Data Connect Work?

Your internal data system communicates with our system to pass sample and submission data back and forth. This system communication happens in real time and allows for customizable time frames for getting information.

## How Secure is DataConnect?

Very. DataConnect uses the latest and most secure encryption technology.

## How Is DataConnect Implemented?

We will work with your IT team to up the DataConnect functionality to connect to your system to ours.

## How Do I Get Started?
