

SMARTFILL® LABEL PROGRAM

This program is designed to ensure the correct Chevron lubricant is used in the right piece of equipment and in the proper location.

Benefits of using SmartFill labels:

- Help Reduce Risk of Mixing Incompatible Lubricants
- Help Remove Opportunity for Human Error
- Simplify Maintenance Tasks
- Protect Your Assets

SmartFill decals are available for many Chevron, Delo®, Ursa® and ISOCLEAN® Certified lubricants. The easy-to-use, icon-based, color-coded identification system helps eliminate top-off error. Each label is printed in English, Spanish and French.

SmartFill labels are printed with fade-resistant, UV-rated dye on a non-melt material and will apply to most metal, plastic and fiberglass surfaces*. All labels are available in two sizes – Fill Point (3" x 5") and Bulk/Tank (7½" x 8"). Plastic tags for smaller fill point areas are also available.

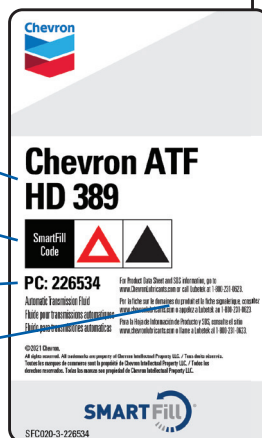

Visit the Chevron Signage and Merchandise Center at www.ChevronMerchCenter.com to order SmartFill decals to protect your valuable equipment.
