SmartFill Labels

Why Label?

- Reduce Risk – Cross Contamination
- Reduce Opportunity for Human Error
- Simplify Maintenance Tasks
- Protect Assets
- Keep Equipment Running
- Avoid the “oops!” Cost

ARTICLE:

[Improve Operational Efficiency with SmartFill Labeling System and Lube Room Chart](#)

Example: Cost for Topping off with Incompatible Lubricants

Description	Lubricant	Lubricant	UOM
Product Name	A	B	
Cost of Lubricant	\$15.00	\$10.00	Per Gallon
Quantity of Lubricant	500 (Reservoir)	55 (drum top-off)	Gallons
Lubricant total value	\$7,500	\$550	Dollars
Total Cost to replace Reservoir w/ Lubricant A		\$8,050	Dollars
Total Cost to label Reservoir		*\$10.00	Total Cost

- Example shows an Incompatible Lubricant B, added to Reservoir where Lubricant A is utilized in a component reservoir. This is cost example for just replacing lubricant, it does not factor in labor (overtime), flushing, downtime or component damage.
- Is it worth spending \$10.00 on labels vs. risk the cost of a incorrect top-off?

**Cost for labeling varies based on # of labels ordered, size, shipping and tax*

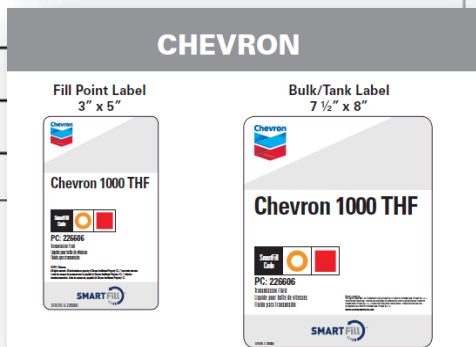

Professional Labels

- UV rated dye, so they don't fade as quickly
- Non-melt material, may affix to equipment
- Easy to understand
 - Product Name
 - Product Code
 - Color Coding
 - LubeTek Hotline listed (*New Feature coming*)
- Coincides with Lube Room Chart
- Easy to order:
 - [Chevron Merchandise Store](#)
- Two Sizes (*see pictures*)
- [Plastic Tag](#) for smaller fill point available separately
